Cross-Platform iOS & Android Development

Islamabad, Pakistan

linkedin.com/in/sajid-gohar-8ba87b150

Hands-on mobile engineer with 6+ years of experience delivering Flutter and native Android applications. Builds production features using Dart, Clean Architecture and BLoC/GetX/Provider, with Firebase, REST API, payment and native integrations. Experience spans offline-first functionality, local data synchronization and iOS/Android releases.

Core Skills and Tools

Flutter and mobile: Flutter, Dart, native Android, Kotlin, Java

Architecture and state management: Clean Architecture, BLoC, GetX, Provider, MVVM, MVC, MVP, SOLID

Backend and offline data: REST APIs, Firebase Authentication, Cloud Firestore, FCM, Crashlytics, SQLite, Room, GetStorage, SharedPreferences, offline-first architecture

Integrations: Stripe, Apple Pay, Google Pay, PayFort, Google Maps, location services, device permissions, push notifications, OCR, RTL and Arabic localization

Development and debugging: Android Studio, Visual Studio Code, Xcode, IntelliJ IDEA, ADB, Android Logcat, Android Profiler

Version control and CI: Git, GitHub, Bitbucket, SourceTree, GitHub Desktop, GitHub Actions

API and database tools: Postman, Apidog, Swagger, phpMyAdmin

Releases and cloud: Google Play Console, App Store Connect, TestFlight, Firebase Console, Google Cloud Console, Vercel, Netlify

Analytics and monitoring: Firebase Analytics, Firebase Crashlytics, Firebase Performance Monitoring, Mixpanel, Google Analytics

AI tools: Claude, ChatGPT, Gemini, ElevenLabs, Claude Code, Codex, Gemini Code Assist

Design and diagrams: Figma, Adobe XD, draw.io

Collaboration: Jira, Trello, Notion, Discord, Lark, Slack, Microsoft Teams, Zoom, Google Meet

Documentation and reporting: Google Docs, Microsoft Word, Google Sheets, Microsoft Excel, Clockify

Work Experience

Senior Flutter Engineer *Sep 2024 - Jul 2026*

Ceital

- Contributed to hands-on mobile application development for Wow Invoice, Ixchange and Revo, including Stripe payment integration.
- Led architecture decisions and code reviews, managed releases and resolved technical and production blockers.

Live App Links

- Wow Invoice (https://play.google.com/store/apps/details?id=com.wow.invoice&hl=en)

Senior Flutter Developer *Mar 2024 - Sep 2024 | Islamabad*

Veroke

- Delivered production features for Ruhiy, Thaat and IWish using Clean Architecture and GetX.
- Integrated Apple Pay, PayFort and Firebase Authentication; implemented responsive interfaces from Figma designs.

Live App Links

- Ruhiy (https://play.google.com/store/apps/details?id=com.ruhiy&hl=en)
- Thaat (https://play.google.com/store/apps/details?id=com.thaat.homecare&hl=en)

Senior Flutter Developer and Project Manager *Aug 2023 - Feb 2024*

Aiodock

- Built and released iOS and Android apps using BLoC/Provider, real-time synchronization, FCM and local storage.
- Combined Flutter development with project planning and delivery coordination in Jira.
- DailyApp: Contributed to a food business app for restaurant and delivery operations.
- Maid Tailor: Built an app for recording tailoring measurements.
- Chalet app: Built an app for chalet bookings.

Flutter Developer *Sep 2022 - Jun 2023*

Veroke

- Built cross-platform features for Majoor, Scrap Bazar and Verope using Flutter, REST APIs and Cloud Firestore.
- Implemented native integrations, device permissions, location services and local data synchronization.

Android Developer *Sep 2020 - Aug 2022*

Veroke

- Developed ArtStation, Tabib Group, Urban Point and Thrift Plan in Java and Kotlin.
- Used MVVM/MVC, Room and SQLite for offline functionality and Firebase Crashlytics to diagnose issues.

- ArtStation (https://play.google.com/store/apps/details?id=com.ballistiq.artstation)
- Tabib Group (https://play.google.com/store/apps/details?id=com.drdizzy)
- Urbanpoint (https://play.google.com/store/apps/details?id=com.urbanpoint.UrbanPoint&hl=en)
- Thrift Plan (https://play.google.com/store/apps/details?id=com.thrift.plan.user)

Projects

Gohar e Gahkuch | Travel and Tour Services

Travel service for private tours and car rentals across Gilgit-Baltistan, with destination information, vehicle options and WhatsApp-based trip inquiries.

Muddaty | Document expiry reminder

Built an offline expiry tracker with local reminders, bilingual UX and Hijri/Gregorian dates.

Gawwap | Social travel app

Built a bilingual travel-video platform using Firebase Authentication and Cloud Firestore.

ShopQuick | Grocery comparison

Built a location-aware grocery comparison app with OCR and comparisons of basket cost, savings and distance.

BaytAI | Interior and Majlis design

Built a Flutter design app and deployed it to Google Play internal testing.

AgriVision | Smart agriculture

Built an offline TensorFlow Lite classifier for 17 wheat conditions, with GPS guidance and bilingual notifications.
